

**EXTREME TELEMATICS CORP COMPLETES MANAGEMENT BUYOUT TO  
ACCELERATE PRODUCT DEVELOPMENT AND ENHANCE PRODUCT OFFERING**

**Management buyout spells bright future for Extreme Telematics Corp.**

**Calgary, AB, April 12, 2013** - Extreme Telematics Corp. (“ETC”), a Canadian engineering firm specializing in designing and manufacturing extreme temperature and hazardous locations certified electronics for the oil and gas industry, today announced a management buyout by the company’s current President and Chief Technical Officer, Mark Scantlebury.

The announcement comes as part of ETC’s focus on geographical and vertical market expansion. The company has already hired Channel Sales Manager, Shane Soum, and Software Engineering Manager, Valens D’Silva, and will be adding more technical resources to assist with the global market expansion. Scantlebury will assume the title of President and Chief Executive Officer.

“ETC has been an important player in plunger lift electronics for years and now we now have the right people in place to take advantage of the demand for our products in new markets,” said Scantlebury.

“The only change our existing customers should notice is an increased level of attention and support as we bring in more resources and continue to produce leading edge innovative products that will change the industry.”

**About Extreme Telematics Corp.**

Extreme Telematics Corp. is a Canadian engineering firm specializing in designing highly reliable, low power, wide temperature range, hazardous locations certified electronics for the oil and gas industry. They have developed innovative electronic controls and sensors that solve complex technical problems in the oil and gas industry.
